

'Generic' Enterprise Dashboard

Product Summary

The 'Generic' Enterprise Dashboard queries agency-specific data from:

- eVA, the state's electronic procurement system
- Commonwealth Accounting and Reporting System (CARS)
- Virginia Excels Web site

The Dashboard is an enterprise solution that presents an at-a-glance summary of agency performance, tracked against strategic business goals and benchmarks. Powerful, intuitive analytical tools and drill-down capabilities enable users to implement performance improvement strategies.

The 'Generic' Enterprise Dashboard module is fully functional and can be used "off the shelf" to gather agency-specific data, analyze the data, and create a variety of views and reports for management and external stakeholders.

Officially recognized by the Department of General Services and the Department of Minority Business Enterprise as the Commonwealth's preferred enterprise tool for tracking/reporting procurement activity and SWAM purchases.

Benefits of 'Generic' Enterprise Dashboard

- Reduces time to monitor and manage agency performance.
- Allows users to actively manage supply chain responsiveness by measuring purchase efficiency, suppliers' performance, and SWAM metrics.
- Provides significant reduction in unit costs through enterprise licensing and shared hardware/support services.
- Modular design allows for rapid, affordable customization.

Availability

The Dashboard pilot program begins Jan. 15, 2006; production begins in February 2006. Each agency can implement its own dashboard within 30 days of order. The Dashboard module is fully functional 'off the shelf.'

Pricing

The Dashboard base module is an entry-level, fully functional solution that includes CARS, eVA, and Virginia Excels data for the agency. There are no upfront or installation costs for executive branch agencies. Cost of development and one-time set-up for executive branch agencies was funded for benefit of the enterprise by the Secretary of Finance.

VITA has proposed the following charges for Generic Dashboard:

- * Under \$100 base charge per month for the agency and one user
- * Under \$20 per month for each additional user

Final pricing will be published after JLARC review and approval.
